Welcome to the 2026 Royalla Bull Sale

The last 12 months have been a difficult time for us and others to both prepare bulls and run cattle. We had just 320mm in the 12 months from 1st May 2025 to 1st May 2026. We were as dry as it has been here with dams going dry. It then changed so quickly from dust to slush that cattle had a hard time adjusting quickly.

Despite this, lots 5 to 34 have still been run completely under Grassfed Accreditation criteria all their lives. This sorts out the ones that are able to survive and thrive under tough conditions. There has obviously been an impact on their sale day weights and performance but we believe this is in the best interests for both the bulls and their working lives.

Lots 1 to 4 were all used in herd as yearlings last Spring and Summer under harsh conditions. They were supplementary fed to enable them to show their genetic potential. The Autumn 'W' bulls were weaned onto zero paddock feed with silage and lupins. After two months they went onto hay and lupins with a maximum of 3 kgs of oat grain per day. Then once the season changed in mid May they went onto a grazing oat crop.

The bulls have been vaccinated for Pesti, 7in1, vibrio, 3 day and tick blooded.

Testicle measurements, crush side semen tested and morphology were done by Dr Hennie Strydom. They were scanned by Roger Evans on the 25th November 2025 and 7th August 2026.

We look forward to being able to host you at Royalla on SALE DAY or welcome you to participate on line.

Our OPEN DAY, Friday 14th August, would be an ideal opportunity for you to view all lots at your leisure and is the best time to discuss the finer details with Nicholas or Neilson and evaluate which bulls would be the best fit for your breeding programme.

Regards,
Nicholas, Neilson and Sue Job

This has been one of the hardest years we have had here at Royalla. Summer and Autumn were as dry as we have seen and most of our dams had dried up. Then, in May, we went from a dust bowl to a mud hole in just a couple of weeks. It got so wet we even had these two black swans take up residence for a couple of weeks.

COMMENTS: He and his mother were missed in the weaning muster and so they spent 2 additional months on poor quality roughage feed. Because of his early potential we persisted with him but because of the time interval he could not be reintegrated into the grass fed mob. A standout for structure and overall sire appeal. A rich, soft roan.

His dam is bred in the purple being 14th generation of exceptional female breeding Melodys in our herds. Pedro daughters are a much valued commodity at Royalla. Would give early maturing females a great lift.

COMMENTS: Rockstar’s last big hurrah ! The best of Royalla and Weebollabolla here. Chosen for the front cover this year, presene and eye appeal written all over him. We purchased the dam as a heifer for \$10,000 from the 2020 Weebollabolla sale. Upon enrolling his dam onto the Shorthorn Beef register, this bull could be HBR. Technical rules have delayed this happening.

COMMENTS: Take a good look at this one. R.Benefactor was the Grand Champion at Sydney Royal in 2024, his dam was a wonderful breeding Isobel donor cow. Sons of hers have sold on farm to \$19,000 and a maternal grandson of hers, R.Diamonte, sold second top price, \$24,000, and a son, Tweed Flash V1 purchased as an embryo, sold for 13,000 for Farquharson P/L, at Dubbo National Sale this year.

COMMENTS: Very correct rich red. The Autumn ‘W’ bulls were weaned onto zero paddock feed with silage and lupins. After two months they went onto hay and lupins and a maximum 3 kg of oat grain per day. Then on to a grazing oat crop in mid May.

COMMENTS: **SEMEN LOT**. Come to see this bull on sale day. A Yeoval Eagle son we are retaining, 100% slick 100% of the year, he was used as a 14 month old yearling in our herd with outstanding calves already on the ground. Greatly admired by visitors who have seen him. His dam, Margies Memory Q328, is the 6th generation from our original Margies importation. Many top bulls have come from this line.
